GUJARAT TECHNOLOGICAL UNIVERSITY (GTU)

Competency-focused Outcome-based Green Curriculum-2021 (COGC-2021)

I – Semester

Course Title: Elements of Textile and Garment Technology

(Course Code: 4312801)

| Diploma programme in which this course is offered | Semester in which offered |
|---|---------------------------|
| Textile Processing Technology | First |

1. RATIONALE

The textile processors (i.e. diploma in Textile processing holders) have to understand various types of textile manufacturing processes which are the prerequisite of Textile processing. i.e. basic processes of making textiles. Textile emanates from fibers. Natural or manmade fibers are converted into yarn and yarn is converted to cloth or textile. Textiles are formed by weaving, knitting, knotting or pressing fibers together. This subject provides basic knowledge of textile manufacturing along with Garment Technology. It includes various textile fibers, their classification. It also provides knowledge of spinning and weaving processes along with the knowledge of Textile Woven Design, Knitting and Texturising.

2. COMPETENCY

The purpose of this course is to help the student to attain the following industry identified competency through various teaching-learning experiences:

 Apply textile manufacturing technology concepts, principles and processes-yarn spinning, weaving, knitting and garment manufacturing in Textile Processing.

3. COURSE OUTCOMES (COs)

The practical exercises, the underpinning knowledge and the relevant soft skills associated with this competency are to be developed in the student to display the following COs:

- a) Use different forms of conventional and eco textile fibers.
- b) Select relevant processes of yarn manufacturing for the given material
- c) Calculate the fineness of the given yarn.
- d) Select relevant processes of yarn texturising and fabric manufacturing.
- e) Select relevant Processes of garment manufacturing.

4. TEACHING AND EXAMINATION SCHEME

| Teachi | ng Scl | neme | Total Credits | Examination Scheme | | | | |
|--------|--------|------|----------------------|--------------------|-----|-----------------------|-----|-------|
| (In | Hours | s) | (L+T+P/2) | Theory Marks | | 1arks Practical Marks | | Total |
| L | T | Р | С | CA | ESE | CA | ESE | Marks |
| 3 | 1 | - | 4 | 30* | 70 | 0 | 0 | 100 |

(*):Out of 30 marks under the theory CA, 10 marks are for assessment of the micro-project to facilitate the integration of COs and the remaining 20 marks is the average of 2 tests to be taken during the semester for assessing the attainment of the cognitive domain UOs required for the attainment of the COs.

Legends: L-Lecture; T – Tutorial/Teacher Guided Theory Practice; P -Practical; C – Credit, CA - Continuous Assessment; ESE -End Semester Examination.

5. SUGGESTED PRACTICAL EXERCISES

The following practical outcomes (PrOs) are the sub-components of the COs.

| S. No. | Practical Outcomes (PrOs) | Unit No. | Approx. Hrs. required |
|-----------|-----------------------------------|-------------|-----------------------------|
| | Not Applicable- | | |

6. MAJOR EQUIPMENT/ INSTRUMENTS REQUIRED – (Not Applicable)

These major equipment with broad specifications for the PrOs is a guide to procure them by the administrators to usher in uniformity of practicals in all institutions across the state.

| S. No. | Equipment Name with Broad Specifications | PrO. No. |
|-----------|--|----------|
| 1 | - Not Applicable- | |

7. AFFECTIVE DOMAIN OUTCOMES

The following *sample* Affective Domain Outcomes (ADOs) are embedded in many of the above-mentioned COs and PrOs. More could be added to fulfill the development of this course competency.

- a) Work as a leader/a team member.
- b) Follow ethical practices.
- c) Follow safety precautions.
- d) Practice environment-friendly methods and processes. (Environment-related)

The ADOs are best developed through laboratory/field-based exercises. Moreover, the level of achievement of the ADOs according to Krathwohl's 'Affective Domain Taxonomy' should gradually increase as planned below:

- i. 'Valuing Level' in 1st year
- ii. 'Organization Level' in 2nd year.
- iii. 'Characterization Level' in 3rd year.

8. UNDERPINNING THEORY

The major underpinning theory is given below based on the higher level UOs of Revised Bloom's taxonomy that are formulated for development of the COs and competency. If required, more such UOs could be included by the course teacher to focus on attainment of COs and competency.

| Unit | Unit Outcomes (UOs) | Topics and Sub-topics |
|-----------------|----------------------------------|---|
| | (4 to 6 UOs at different levels) | |
| Unit – I | 1a. Explain basic textile | 1.1 Textile terminologies- Meaning. |
| | terminologies. | 1.2 Yarn manufacturing process- Flow |
| Introduction of | 1b. Draw flow chart of textile | chart, components. |
| textile | manufacturing processes. | 1.3 Woven fabric manufacturing |
| | 1c. Justify the need for eco | process- Flow chart, components |
| | fibres. | 1.4 Eco fibres: Introduction, |
| | 1d. Classify eco fibres based on | characteristics, classification |
| | their characteristics. | |
| Unit – II | 2a. Explain the working | 2.1. Cotton ginning process |
| | principle of cotton ginning | 2.2. Knife roller ginning machine- |
| Yarn | machines. | Working principle |
| manufacturing | 2b. Describe the purposes of | 2.3. Objects of various spinning process. |
| processes | the given spinning process. | 2.4. passage of material through various |
| | 2c.Explain the passage of | machines: |
| | material through spinning | (i) Modern Blow room Line |
| | machines. | (ii) Card |
| | | (iii) Draw frame |
| | | (iv) Lap former |
| | | (v) Comber |
| | | (vi) Speed frame |
| | | (vii) Ring frame |
| Unit-III | 3a. Compare different Yarn | 3.1 Yarn numbering system: Types |
| | numbering systems. | 3.2 Yarn numbering system |
| Yarn | 3b. Use relevant yarn | (i) Indirect numbering system: |
| Numbering | numbering system to | English, Metric, Woolen, |
| System | calculate yarn count from | Worsted |
| | the given data. | (ii) Direct numbering system: Tex, |
| | 3c. Conversion of various | Denier |
| | numbering system. | 3.3 Yarn numbering and its conversion |

| Unit- IV | 4a. Describe the texturising | 4.1. Texturising process- Introduction |
|-----------------|------------------------------------|---|
| | process. | 4.2. Texturising process-Objectives, |
| Vario | • | |
| Yarn | 4b. Describe the objectives/ | Texturising methods, crimping, the |
| Texturising | purposes of the Weaving | passage of filament through false |
| and Fabric | Preparatory &Weaving | twist texturing m/c. |
| manufacturing | process | 4.3. Purposes of Weaving Preparatory |
| processes | 4c. Explain with sketch the | and weaving process. |
| | passage of material through | 4.4. Passage of material through |
| | Weaving Preparatory & | following machines with the neat |
| | Weaving Machine. | sketch: |
| | 4d. Describe the basic designs | (i) Winding machine |
| | in weaving. | (ii) Warping machine |
| | 4e. Explain the principles of | (iii) Multi-cylinder sizing machine |
| | knitting. | (iv) Plain Power loom |
| | 5 6 | 4.5. Basic weaves -Plain, Twill, Sateen, |
| | | satin with design, draft and peg |
| | | plan. |
| | | 4.6 Knitting- Introduction, Warp and |
| | | weft knitting principle. |
| Unit- V | En State the importance of the | = - |
| Unit- v | 5a. State the importance of the | 5.1 Importance of garment industry to |
| | garment industry | present textile trends |
| Introduction to | 5b. Select suitable fabric for the | 5.2 Factor affecting selection of fabrics for |
| garment | end use | final end product. |
| technology | 5c. Explain the garment | 5.3 Stages of the garment |
| | manufacturing process. | manufacturing process. |
| | | |

9. SUGGESTED SPECIFICATION TABLE FOR QUESTIONPAPER DESIGN

| Unit | Unit Title | Teaching | Distribution of Theory Mark | | | Marks |
|------|------------------------------------|----------|-----------------------------|-------|-------|-------|
| No. | | Hours | Hours R | | Α | Total |
| | | | Level | Level | Level | Marks |
| 1 | Introduction of Textile | 06 | 4 | 4 | 2 | 10 |
| П | Yarn manufacturing processes | 11 | 6 | 8 | 4 | 18 |
| Ш | Yarn numbering system | 05 | 2 | 2 | 6 | 10 |
| IV | Yarn Texturising & Fabric | 14 | 8 | 8 | 4 | 20 |
| | manufacturing processes | | | | | |
| V | Introduction to Garment Technology | 06 | 2 | 8 | 2 | 12 |
| | Total | 42 | 22 | 30 | 18 | 70 |

Legends: R=Remember, U=Understand, A=Apply and above (Revised Bloom's taxonomy)

<u>Note</u>: This specification table provides general guidelines to assist students for their learning and to teachers to teach and question paper designers/setters to formulate test items/questions to assess the attainment of the UOs. The actual distribution of marks at different taxonomy levels (of R, U and A) in the question paper may slightly vary from above table.

10. SUGGESTED STUDENT ACTIVITIES

Other than the classroom and laboratory learning, following are the suggested student-related **co-curricular** activities which can be undertaken to accelerate the attainment of the various outcomes in this course: Students should perform following activities in group and prepare reports of about 5 pages for each activity. They should also collect/record physical evidences for their (student's) portfolio which may be useful for their placement interviews:

- a) Visit nearby spinning and weaving industries and prepare a detailed report of the visit
- b) List out different manufacturers of spinning machines.
- c) List out different manufacturers of weaving machines.
- d) Collect specifications of different types of spinning and weaving machines.
- e) Prepare survey report of different garments.

11. SUGGESTED SPECIAL INSTRUCTIONAL STRATEGIES (if any)

These are sample strategies, which the teacher can use to accelerate the attainment of the various outcomes in this course:

- a) Massive open online courses (*MOOCs*) may be used to teach various topics/subtopics.
- b) Guide student(s) in undertaking micro-projects.
- c) "L" in section No. 4means different types of instructional methods that are to be employed by teachers to develop the outcomes.
- d) About 20% of the topics/sub-topics which are simpler or descriptive could be given to the students for self-learning but need to be assessed using different assessment methods.
- e) With respect to *section No.10*, teachers need to ensure to create opportunities and provisions for *co-curricular activities*.
- f) Guide students on how to address issues on environment and sustainability using the knowledge of this course.

12. SUGGESTED MICRO-PROJECTS

Only one micro-project is planned to be undertaken by a student that needs to be assigned to him/her in the beginning of the semester. In the first four semesters, the micro-project are group-based (group of 3 to 5). However, **in the fifth and sixth semesters**, the number of students in the group should **not exceed three**.

The micro-project could be industry application based, internet-based, workshop-based, laboratory-based or field-based. Each micro-project should encompass two or more COs which are in fact, an integration of PrOs, UOs and ADOs. Each student will have to maintain dated work diary consisting of individual contribution in the project work and give a seminar presentation of it before submission. The duration of the microproject should be about 14-16 (fourteen to sixteen) student engagement hours during the course. The students ought to submit micro-project by the end of the semester to develop the industry-oriented COs.

A suggestive list of micro-projects is given here. This should relate highly to the competency of the course and the COs. The concerned course teacher could add similar micro-projects:

a) **Ginning**: Prepare the report of different Ginning machines with their specifications, material and processes.

- b) **Yarn preparatory**: Prepare the report of different yarn preparatory machines with their specifications, material and processes.
- c) **Weaving preparatory:** Prepare the report of different weaving preparatory machines with their specifications, material and processes.
- d) **Weaving:** Prepare the report of different weaving machines with their specifications, material and processes.
- e) **Garment Manufacturing**: Prepare the report of different types of garments used with their fabric specifications, material and processes.

13. SUGGESTED LEARNING RESOURCES

| S. No. | Title of Book | Author | Publication with the place, year and ISBN |
|-----------|---------------------------|-------------------------|---|
| 1 | Volume-1-Technology of | Werner Klein | Rieter Machine Works Ltd. |
| | Short Staple Spinning | | Winterthur, 2014 |
| | | | ISBN 10 3-9523173-1-4/ISBN 13 938- |
| | | | 3-9523173-1-0 |
| 2 | fibre to fabric | Bernard P. Corbman | McGraw-Hill Education – Europe, |
| | | | 1983 |
| | | | ISBN: 978-007-0662-360 |
| 3 | Weaving Machine, | Dr M. K. Talukdar, | Mahajan publishers Pvt. Ltd. |
| | mechanism and | Prof. P. K. Shriramulu, | Ahmedabad, 1998 |
| | management | Prof. D. B. Ajgaonkar | ISBN 81-85401-16-0 |
| 4 | Weaving-Conversion of | P.R.Lord and | Merrow Publishing Co. Ltd., England, |
| | yarn to fabric | M.H.Mohamed | 1982 |
| | | | ISBN: 0 900 54178 4 |
| 5 | Technology of Clothing | Carr& Latham | Black well publisher England,2009 |
| | manufacture | | ISBN: 978-1-4051-6198-5 |
| | | | |
| 6 | Textile Spinning, Weaving | M.G.Mahadevan | Abhishek Publications, Chandigarh |
| | and Designing | | ISBN:978-81-8247-107-8 |
